Acknowledgments:
We would like to thank Jyoti Atri, Kirsty Little and Sian Price for reviewing this guide. We are grateful to Ben Gray and Mischa Van Eimeren for proofreading, and Hayley Jenney at Jenney Creative for the design of this guide.
Addressing the imbalances that threaten our society and living conditions is critical to ensure prosperity for all in Wales. It is now recognised, based on extensive evidence, that ‘business as usual’ is not sustainable in the long term and has high costs to citizens, communities, the economy, and the environment.

New investment models and innovative solutions are urgently needed to secure the well-being of current and future generations. Policy decisions in different sectors influence the wider determinants with potential positive or negative impact on health and equity. At the same time, improving health and reducing inequities bring returns to all sectors and are key to creating prosperous lives.

Now, we know more than ever that prevention across all policies and sectors, not only saves lives and improves health and well-being. It also brings multiple co-benefits to communities and the society, and contributes to our economy and a fair sustainable growth. This is a significant opportunity for us.

Wales is in an exciting position to make sustained and continued improvements in people’s health and well-being through its advanced legislation and the national strategy Prosperity for All. In addition, our new World Health Organization (WHO) Collaborating Centre on Investment for Health and Well-being is already working to develop, gather and share information and tools on how best to invest in better health and equity, and promote sustainable development.

With this evidence guide, Public Health Wales would like to inform and support decisions and policies and to join an all-Wales commitment and action to make a positive change towards a healthier, happier and prosperous future for all people in Wales.

About this guide

Prosperity is not just about material wealth – it is about every one of us having a good quality of life, and living in strong, safe communities.

Welsh Government, Prosperity for All (1)

Grounded in the Well-being of Future Generations (Wales) Act (WBFG)(2), the Programme for Government, Taking Wales Forward(3), has set out the key commitments Welsh Government will deliver by 2021- to build a Wales that is prosperous and secure, healthy and active, ambitious and learning, and united and connected. Following from this, the Prosperity for All government strategy (1) sets out five priority areas: early years, housing, social care, mental health and skills and employability (Figure 1).

This guide has been developed to inform and facilitate the delivery of the Prosperity for All strategy. It suggests policy options for priority investment, based on the best available Welsh and European evidence (4,5) - to drive consensus and action through participatory cross-sector multidisciplinary dialogue and partnership. The priority areas outlined align with Welsh Government’s commitment described within A Healthier Wales(6) to maintain a ‘wellness’ system which aims to support and anticipate health needs, to prevent illness, and to reduce the impact of poor health.

This guide can be used by policy- and decision-makers across national and local government, the health and social care service, and public bodies in all other sectors in Wales.

The existing evidence and relevant policy options with examples are mapped across the Prosperity for All key themes and priority areas (Figure 1). They are presented in the following three parts of this guide:

1. **Part I** outlines Wales’ unique enabling legal and strategic context, together with an overarching summary of the suggested key policy options for priority investment.

2. **Part II** provides a summary of the evidence for sustainable investment, mapped to the Prosperity for All key themes.

3. **Part III** suggests key policy options for priority investment, mapped to the Prosperity for All priority areas, and allocated to the responsible sector.

All evidence presented in this document has been extracted from the following evidence synthesis reports:

For further information, please contact the authors.
Driving Prosperity for All through Investing for Health and Well-being

Prosperity for All
The National Strategy

KEY THEMES
- Prosperous & Secure
- Healthy & Active
- Ambitious & Learning
- United & Connected

PRIORITY AREAS
- Early Years
- Housing
- Social Care
- Mental Health
- Skills & Employability

An Evidence Guide for Cross-sector Investment
- Summary of evidence-based public health policies and interventions for each key theme, that drive sustainable inclusive economic growth
- List of evidence-based policy options for cross-sector investment to enable Prosperity for All in Wales
Part I. Wales’ legal and strategic context as an enabler of well-being and prosperity for all

The ground-breaking Well-being of Future Generations (Wales) Act 2015 (WFGA)\(^{(2)}\), requires public bodies across all sectors to focus on improving the social, economic, environmental and cultural well-being in Wales. They have to work together effectively to achieve the seven Welsh well-being goals, by applying ‘five ways of working’: prevention, integration, long term, involvement and collaboration. Thus, the WFGA provides the opportunity and tools to implement the global 2030 Agenda for Sustainable Development\(^{(7)}\) on a national and local level.

The WFGA offers an overarching enabling framework to address current and future challenges and the needs of people in Wales, in synergy with a number of modern Welsh laws (Figure 2). This represents a wide national effort to drive cross-sector partnerships and action towards a prosperous and inclusive economy; secure and thriving population health and well-being; safe natural and built environments; resilient and empowered communities and citizens; and robust and innovative public services.

The Prosperity for All strategy\(^{(1)}\) builds on this, particularly through the key theme of ‘Healthy and Active’, with a shift in emphasis from treating illness to prevention, well-being and promoting active lifestyles. All of its priority areas provide an inter-link between various sectors and health, enabling investment in policies and interventions that drive sustainable and inclusive economic growth as well as the well-being of the present and future generations in Wales.

In this context, decision-makers need to think about the future and plan for the long-term in Wales\(^{(8)}\). This is important, as we live in an increasingly changing globalised world, where new developments pose multiple and sometimes unknown challenges as well as bringing new opportunities. Long-term planning can facilitate better decisions for action and investment in the present, which are more robust in the face of different futures. This would help manage uncertainty and unforeseen challenges; mitigate risks and unintended consequences; and make the most of new opportunities\(^{(8)}\).
Driving Prosperity for All through Investing for Health and Well-being

Figure 2. Prosperity for All strategic themes and priority areas working in synergy with the Welsh legislation \(^{16, 9, 10, 11, 12, 13}\), enabled by the WFGA \(^5\).

**Well-being of Future Generations (Wales) Act 2015**

The Act sets out the need for a long-term focus, and five ‘ways of working’:

- Long term
- Prevention
- Integration
- Collaboration
- Involvement

- Active Travel (Wales) Act 2013
- Housing (Wales) Act 2014
- Social Services and Well-being (Wales) Act 2014
- Environment (Wales) Act 2017
- Public Health (Wales) Act 2017
- Public Health Minimum Unit Pricing Alcohol (Wales) Bill

**Prosperity for All - the national strategy**
Part II. **Investing in public health enables sustainable and inclusive economic growth: summary of evidence, supporting the Prosperity for All key themes**

There are persistent and new health, social, economic and environmental challenges in Wales and globally that require urgent and priority-focused investment to ensure well-being and prosperity for the current and future generations.

A substantial body of evidence\(^{(4,5)}\) recognises that doing business as usual is unsustainable with high costs for individuals, families, communities, society, the economy and the planet. For example, the estimated costs of health inequalities to the Welsh economy can reach £1.8 to £1.9 billion per year from productivity losses; and another £1.1 to £1.8 billion per year from lost taxes and welfare costs\(^{(5)}\).

Investing through prevention and early intervention (public health) across all sectors provides innovative solutions to drive sustainable and inclusive economic growth\(^{(4,5)}\). For example, increasing cycling and walking in urban areas can save £0.9 billion, and addressing cold and damp housing can save £35 million - to the NHS in Wales over 20 years\(^{(5)}\).

The following four boxes (pages 8 to 11) provide a summary of evidence-based public health policies and interventions that drive sustainable development, mapped to each of the four Prosperity for All key themes (Figure 3). More information and the respective sources can be found in the evidence synthesis reports used\(^{(4,5)}\).

*Figure 3. Overview of the four boxes (pages 8 to 11) with summary evidence, supporting the Prosperity for All key themes*
I. Prosperous and secure

Policy areas for targeted investment include:

Universal social protection
Effective social transfers and provision of adequate and sustainable funding for social protection, legislation and an administrative system. For example, studies in the United Kingdom and United States show that the implementation of a living wage is associated with improved mental health and lower mortality risk, with possible trans-generational effects.

Healthy jobs and workplace
Health-promoting workplace programmes with positive impacts on health and well-being can be cost-effective. For example, in the United Kingdom (UK), a range of behaviour-change workplace programmes return from £2 to £10 per £1 invested.

The health sector
Investment in the health system generates decent and inclusive jobs, with gains for social protection, human and health security, equity and human rights, and women’s and youth’s economic empowerment.

Environmental sustainability and mitigating climate change
Cross- and multi-sector interventions, reducing air pollution and greenhouse emissions. For example, reducing air pollution in the UK shows a return of £6 per £1 invested. Social prescribing for mental illness is highly cost-effective with a smaller carbon footprint than cognitive behavioural therapy or medication. Mobile health services may increase environmental sustainability.

Gender equality
Reducing gender inequalities through education, labour, wage and social protection policies, strong labour rights and expansion of women’s leadership roles all benefit the economy.
II. Healthy and active

Policy areas for targeted investment include:

Social care and communities

Developing greener and safer communities to reduce inequalities; ensuring healthier air; healthy jobs and workplaces; ensuring a good start in life; and providing healthy ageing in the community. For example, NHS Scotland have reported that traffic calming schemes (e.g. 20 mph speed zones) in disadvantaged areas could lead to a 100% return on investment in the first 12 months. Investing in the first 1,000 days (from conception to the second birthday) is cost-effective and has the most potential for action, for example, support to mothers before and after giving birth, breastfeeding and nutrition support, parenting support, access to health services and childcare, and access to early education.

Preventing unhealthy behaviours

Reducing tobacco consumption; addressing alcohol misuse; and preventing obesity. For example, if 100,000 smokers quit, this could potentially save the NHS £159 million due to less admissions for smoking-related illnesses and associated medication costs. The most cost-effective measures to prevent and address alcohol misuse remain price interventions through taxation or increased Minimum Unit Pricing (MUP). ‘Best-buy’ interventions by the WHO to promote healthy diet, include reducing salt intake, replacing trans fatty acids and raising public awareness of a healthy diet and managing food taxes and subsidies.

Prevention - public health services

Immunization, targeted interventions to prevent communicable diseases, environmental interventions, surveillance and control measures, and screening programmes. Local and national public health interventions in the UK are highly cost-saving, showing a median return of £14.3 for each £1 invested.
III. Ambitious and learning

Policy areas for targeted investment include:

Early years and school-aged children

This should go beyond child survival and physical development to include interventions targeting social, emotional and cognitive development, such as providing support to mothers before and after giving birth, breastfeeding and nutrition support, parenting support, access to health services and childcare, and access to early education. For example, in the UK, investing in a combination of universal and targeted early years’ interventions with paid parental leave could save £1.5 trillion over 20 years on societal problems.

Life-long learning opportunities

Reducing the number of young people not in education, employment or training; and supporting adult learning and employment. For example, in the UK the social return for adult education is £21.60 per £1 invested at age 19–24 years; even among those aged 25 and over, the return is still £5.90 per £1 invested. A Ready for Work programme in the UK for disadvantaged young people brings a return of £3.12 per £1 invested and an overall social impact of £3.2 million per year, through reduced costs associated with homelessness, crime, benefits and health care.
IV. United and connected

Policy areas for targeted investment include:

Supportive and resilient communities through proportionate universalism and life course approaches

Supporting children and their families; preventing and addressing domestic violence; life-course approach to healthy ageing; and community actions improve health and well-being. For example, preventing Adverse Childhood Experiences (ACEs) and improving resilience and protective factors for children in Wales could reduce violence perpetration in adults by 60% and violence victimisation in adults by 57%. Interventions for healthy ageing include, for example, falls and injury prevention; physical activity; vaccination; preventing mental ill health, elder maltreatment, social isolation and exclusion; multifaceted housing interventions; and others.

Spatial and urban planning initiatives

Increasing green spaces such as parks, gardens and playgrounds are linked to improved health; low emission zone and speed management; removing old chemicals from homes (e.g. asbestos and lead); effective waste-disposal; and others.

Information and communication technologies for health

Better use of information and communication technology for health, such as e-health, tele-health and m-health, has the potential to reduce the need for travel. For example, in England, the use of tele-care for long-term conditions could reduce carbon dioxide emissions and save £2.55 million per year by 2020.
The complex interconnected nature of challenges and solutions requires strong political leadership and commitment across all government levels and departments. Public bodies across all sectors play an important role. Working together with people and communities in a participatory way is essential to inform, develop and implement successful policies that are conducive to health, well-being and prosperity for all. Targeted research, monitoring, evaluation and an integrated information system are an essential part of this.

The following five infographics (pages 13 to 22) suggest evidence-based policy options for priority investment, mapped to each of the *Prosperity for All* key themes (Figure 4). More information and the respective sources can be found in the evidence synthesis reports used (4,5).

Within each priority area, the suggested policy options are allocated to the responsible sector / stakeholders, presented in three groups:

1. **National Level - Welsh Government**
   The First Minister has an overarching responsibility to provide insight into all five of the *Prosperity for All* priority areas. Each priority area fits explicitly within existing portfolios of individual Ministers. However, the priority areas are cross-cutting and inter-link with a number of portfolios as well.

2. **Health and social care sector - NHS Wales, including Public Health Wales**
   (working in collaboration with third and private sector bodies)

3. **Other public sectors and Local Authorities**
   (working in collaboration with third and private sector bodies)
### I. Early years

**Policy options to target investment include:**

1. **Applying a proportionate universalism* approach to early years**

2. **Supporting parents and preventing Adverse Childhood Experiences (ACEs)**

#### Key Responsibilities:

<table>
<thead>
<tr>
<th>Welsh Government</th>
<th>• Support early child development (ECD) interventions such as: support to mothers before and after giving birth, breastfeeding and nutritional support, parenting support, access to health services and childcare, and access to early education, etc.</th>
</tr>
</thead>
</table>

This Priority falls within the portfolio of the following Ministers:

- Minister for Health and Social Services
- Minister for Education

| NHS Wales, including Public Health Wales | • ECD interventions (see above examples)  
• Parenting programmes  
• Implementing National Institute for Health and Care Excellence (NICE) guidance on promoting the quality of life of looked after children and young people  
• Earlier access to mental health services  
• Preventing dental decay |
|---|---|

| Other public sectors and local authorities | • ECD interventions (see above examples)  
• Parenting programmes  
• Programmes addressing emotion-based learning in schools  
• Early education (0-3 years) & pre-school programmes (4-5 years)  
• Preventing dental decay  
• Preventing ACEs and improving resilience |
|---|---|

---

* Resourcing and delivering universal services at a scale and intensity proportionate to the degree of need
Driving Prosperity for All through Investing for Health and Well-being

Preventing costs*

Around 80% of all criminal activity in Britain is attributed to behavioural problems in childhood or adolescence with a total cost to society of £60 billion per year.

In Wales, ACES are associated with:
- over 1/2 of the violence and drugs abuse
- over 1/3 of teenage pregnancies
- nearly 1/4 of adult smoking

Bringing social and economic returns**

In the United Kingdom, the ‘Triple P’ parenting programme which aims to reduce conduct disorder can save an estimated £20 million for a cost of £5 million.

In the United States and European countries, investing in ECD brings £1.30 to £16.80 for every £1 invested with wider social benefits across the family targeted and in the next generation (converted from US dollars).

Every £1 invested in parenting programmes to prevent conduct disorder saves the NHS in England £8 over 6 years.

In Wales, ACEs are associated with:
- over 1/2 of the violence and drugs abuse
- over 1/3 of teenage pregnancies
- nearly 1/4 of adult smoking

In the United States and European countries, investing in ECD brings £1.30 to £16.80 for every £1 invested with wider social benefits across the family targeted and in the next generation (converted from US dollars).

Every £1 invested in parenting programmes to prevent conduct disorder saves the NHS in England £8 over 6 years.

Preventing costs*

Investing in targeted interventions + universal childcare + paid parental leave in Wales could save £72 billion over 20 years from the costs of social problems.

Every £1 invested in parenting programmes to prevent conduct disorder saves the NHS in England £8 over 6 years.

In the United States and European countries, investing in ECD brings £1.30 to £16.80 for every £1 invested with wider social benefits across the family targeted and in the next generation (converted from US dollars).

Every £1 invested in parenting programmes to prevent conduct disorder saves the NHS in England £8 over 6 years.

* Data retrieved from Public Health Wales (2016) Making a Difference
II. Housing

Policy options to target investment include:

1. Ensuring safe and healthy housing
2. Preventing homelessness
3. Providing adequate housing for healthy and active ageing

Key Responsibilities:

| Welsh Government | • Preventing homelessness through reducing levels of unemployment and poverty  
|                  | • Providing safe and healthy housing |

This Priority is directly relevant to the portfolio of the following Ministers:

• Minister for Health and Social Services  
• Minister for Economy and Transport  
• Minister for Housing and Local Government

| NHS Wales, including Public Health Wales | No specific evidence-based interventions for the health sector. A role to continue to inform, support and work with Welsh Government and other sectors. |

| Other public sectors and local authorities | • Making housing improvements to ensure homes are safe, dry, warm and free of fuel poverty  
|                                           | • Developing adequate housing for health and active ageing (to prevent falls and injuries) |
Driving Prosperity for All through Investing for Health and Well-being

Preventing costs*

Unsafe stairs and steps, electrical hazards, damp and mould growth, excessive cold and overcrowding cost

£67 million per year to the NHS in Wales

Wider cost to society of poor housing, including factors such as poor educational attainment and reduced life chances -

£168 million per year in Wales

Bringing social and economic returns**

Supported housing for families with complex emotional needs and chaotic lives in the UK

can save £12,000 per client for local authorities

In France, removing lead from domestic paint & plumbing in at-risk neighbourhoods – costs £3,215 - £8,216 per home –

but can save £7,859 – £45,902 a year per de-leaded home from the cost of illness***

In the Netherlands, for every £1 spent on preventing homelessness, approximately £2.20 is saved elsewhere including in emergency health care, psychiatric services and prisons****

Investing in insulation and heating to address cold and damp housing could return nearly £35 million for the NHS in Wales

* Data retrieved from Public Health Wales (2016) Making a Difference

*** Converted from European data (France)

**** Converted from European data (Netherlands)
### III. Social care

Policy options to target investment include:

1. **Providing universal social protection**
2. **Adopting a life course approach to health and social care starting from the early years to healthy ageing**
3. **Preventing and addressing domestic violence**

#### Key Responsibilities:

<table>
<thead>
<tr>
<th>Welsh Government</th>
<th>Providing universal social protection, including effective social transfers and provision of adequate and sustainable funding for social protection, legislation and administrative system – for example, introducing a living wage</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>
Driving Prosperity for All through Investing for Health and Well-being

**Preventing costs***

*Data retrieved from Public Health Wales (2016) Making a Difference* (5)

In 2009, violence cost the Welsh economy £2 billion.

In Wales, **domestic violence and abuse** cost public services £304 million per year.

**Human and emotional costs** are an additional £523 million per year.

**Bringing social and economic returns**

Implementing national guidance on domestic violence and abuse could save £4,700 per month per person on longer-term costs of treating and supporting someone with post-traumatic stress disorder as a result of violence and abuse in the United Kingdom.

A primary care programme in the United Kingdom to identify domestic violence and abuse has societal savings of £37 per year per woman registered with the practice.

In Cardiff, a **multi-agency approach** to sharing and using Emergency Department data saves £82 to society per £1 invested.

and is associated with a reduction in hospital admissions for violence.

In the United States, a **support programme** from nurses for vulnerable first-time mothers saves £2 per 70p invested.

and reduces child maltreatment and criminal behaviour.

In the United Kingdom, **falls prevention leaflets** cost £349 per person but can save £3,320 per fall averted.

In the United Kingdom, **debt advice services** can return £2.92 per £1 invested.

IV. Mental health

Policy options to target investment include:

1. Promoting mental health in the workplace
2. Preventing mental ill-health in children and eradicating Adverse Childhood Experiences (ACEs)
3. Ensuring early access to mental health services
4. Improving mental health in older people

Key Responsibilities:

**Welsh Government**
- Promoting mental health
- Supporting parents and early years
- Supporting lifelong learning
- Supporting communities

This Priority is directly relevant to the portfolio of the following Ministers:
- Minister for Health and Social Services
- Minister for Education

**NHS Wales, including Public Health Wales**
- Supporting positive steps for mental health: lifestyle (diet, exercise, sensible drinking) and social support
- Interventions targeting children and their parents
- Early access to mental health services
- Implementing National Institute for Health and Care Excellence (NICE) guidance on promoting the quality of life of looked after children and young people
- Improving mental health in older people

**Other public sectors and local authorities**
- Promoting mental health or screening for mental health disorders in the workplace
- Supporting parents and early years: parenting skills training, pre-school education, home learning environment, such as pre-school parenting programmes for conduct disorder
- Supporting lifelong learning: health promoting schools and continuing education, such as emotion-based learning and anti-bullying programmes in schools
- Improving working lives - employment and workplace
- Supporting communities through environmental improvements
- Improving mental health in older people
Driving Prosperity for All through Investing for Health and Well-being

**Preventing costs**

In the United Kingdom, mental ill health in childhood costs society

£11,000 to £59,000 per year per child

In Wales, mental ill health costs society

£7 billion per year

**Bringing social and economic returns**

Promoting positive mental well-being programmes for everyone born in Wales in a single year

would cost approximately £20 million

with potential benefits of £1,114 million

In the NHS in England, investing in school based social and emotional learning

costs £132 per pupil per year

and can save the health sector £39 per pupil in the first year

rising to £751 per pupil by the fifth year

In the United Kingdom, anti-bullying interventions in schools can return £15 for every £1 spent

In the United Kingdom, improving mental health in the workplace

could produce annual savings of £250,607 for an organisation with 1,000 employees

* Data retrieved from Public Health Wales (2016) Making a Difference
V. Skills and employability

Policy options to target investment include:

1. Providing good quality healthy education
2. Ensuring healthy jobs and workplaces
3. Providing universal social protection

Key Responsibilities:

**Welsh Government**

- Policies to ensure fair and decent work for all, such as:
  - investment strategies for an inclusive economy;
  - active labour market programmes;
  - extending worker representation, particularly for more disadvantaged workers;
  - adequate health and safety legislation;
  - extending employment rights, particularly for self-employed, temporary, part-time and informal workers (who are mostly women)
- Universal social protection, including effective social transfers and provision of adequate and sustainable funding for social protection, legislation and administrative system – for example, introducing a living wage

This Priority is directly relevant to the portfolio of the following Ministers:

- Minister for Economy and Transport
- Minister for Health and Social Services
- Minister for Housing and Local Government

**NHS Wales, including Public Health Wales**

- Supporting healthy behaviours and health literacy

**Other public sectors and local authorities**

- Access to quality early education and care
- Education – all stages: (1) Early education (0-3 years); (2) Pre-school programmes (4-5 years); (3) Schooling; and (4) Post-schooling / job training
- Providing employment and healthy jobs - supporting adult learning and employment; a Ready for Work programme for disadvantaged young people
- Health-promoting workplaces and rehabilitation
In the United Kingdom, each young person (16–18 years) who is not in education, employment or training is estimated to cost society £56,000 over their lifetime, including welfare, tax, health and criminal justice costs.

Nearly 1 million working days are lost due to loss of employment or reduced employment opportunities in Wales.

In the United Kingdom, Social Return on Investment (SROI) for adult education is £21.60 for every £1 invested at age 19–24 years and £5.90 at age 25 years and over.

Workplace interventions to promote mental health could save up to £136 billion a year by reducing absenteeism and early retirement.

A Ready for Work programme for disadvantaged young people in the United Kingdom brings a Social Return on Investment (SROI) of £3.12 per £1 invested, and an overall social impact of £3.2 million per year through reduced costs associated with homelessness, crime, benefits and health care.

Investing in employment support to get people back into work in London has brought an SROI of £17.07 per £1 spent.

In England, a range of behaviour-change programmes in the workplace return £2 to £10 per £1 spent.

* Data retrieved from Public Health Wales (2016) Making a Difference
There is strong evidence to invest across all sectors, in policies that drive social, economic and environmental sustainability. Public health plays a key role through prevention and early intervention; informing, supporting and working together with others to drive well-being, equity and prosperity for current and future generations in Wales.

This guide has identified **ten key evidence-based policy options for priority investment in Wales**. These address areas of high burden and costs, as well as, demonstrating co-benefits (returns) to the economy, society and the environment, supporting the four key themes and five priority areas of the *Prosperity for All* strategy (*Figure 5*).

*Figure 5. Summary of evidence-based policy options for priority investment, which bring social, economic and environmental returns for Wales*
Driving Prosperity for All through Investing for Health and Well-being

References

Public Health Wales
what we do

We exist to protect and improve health and wellbeing and reduce health inequalities for people in Wales. We work locally, nationally and internationally, with our partners and communities, in the following areas:

- Health Protection: Providing information and advice and taking action to protect people from infectious diseases and environmental hazards.
- Microbiology: Providing a network of microbiology services which support diagnosis and management of infectious diseases.
- Health Improvement: Providing information, advice and taking action, across sectors, to promote health, prevent disease and reduce health inequalities.
- Screening: Providing screening programmes which assist the early detection, prevention and treatment of disease.
- Health Intelligence: Providing public health data analysis, evidence finding and knowledge management.
- Policy, research and international development: Influencing policy, supporting research and contributing to international health development.
- Safeguarding: Providing expertise and advice to help protect children and vulnerable adults.
- NHS quality improvement and patient safety: Providing the NHS with information, advice and support to improve patient outcomes.
- Primary, community and integrated care: Strengthening public health impact through policy, commissioning, planning and service delivery.
